Deconstructing the Technical Presentation

Course Specification

Course Description

This workshop explores the essential components of working with required data, paired with elevated techniques on how to engage and connect with any audience and how to deliver a presentation that is impressive. A live technical presentation will be delivered by a working engineer, then broken into individual pieces and analyzed to reveal the process of creating an impactful presentation. We’ll explore and demonstrate step-by-step how to organize your content, design your slides, and deliver your message. There are specific methods that can subtly change a dry data-driven presentation into a memorable experience for the listeners, and we’ll share them all with you.

Course Outline

- Overview of Technical Presentation Concepts
- Sample Presentation on FPGA Design – Delivered by Co-Instructor
- Analysis Exercise
- In-Depth Evaluation of 12 Key Components

Course Duration – Lunch & Learn (60-90 Minutes)

Price - $197 USD

Course Part Number – TCW-DTP-CLW

Who Should Attend - This course is intended for technical professionals at all levels of skill to demonstrate the components of an effective technical presentation.
